# URBAN AGRICULTURE as a Catalyst for Community Development

Wednesday, June 22, 2022 6pm

This **virtual conference** will spotlight community commercial development projects proposed by Newark-based growers and demonstrate how urban agriculture creates a pathway to a green economy, also allows for the development of a variety of environmental and social benefits.

**Urban agriculture, urban farming, or urban gardening** is the practice of cultivating, processing, and distributing food in or around urban areas. Urban agriculture is also the term used for animal husbandry, aquaculture, urban beekeeping, and horticulture. These activities also occur in peri-urban areas.
